

LAB 7

```

class Gen <T>
{
    T ob;
    Gen(T o)
    {
        ob = o;
    }
    T getob()
    {
        return ob;
    }
    void showtype()
    {
        System.out.println("Type of T : " + ob.getClass().getName());
    }
}

class Gendemo
{
    public static void main(String args[])
    {
        public
        Gen<Integer> iob = new Gen<Integer>(88);
        iob.showtype();
        int v = iob.getob();
        System.out.println("value : " + v);

        Gen<String> sobj = new Gen<String>("Hello");
        sobj.showtype();
        String str = sobj.getob();
        System.out.println("value : " + str);
    }
}

```
